

Wetlands = Life!

They store water, protect biodiversity, and fight climate change — but they're disappearing fast.

Have you ever noticed how rivers, lakes, and wetlands give life to everything around them?

From the fish we eat, to the clean water we drink, to the birds and animals that make our lands beautiful — wetlands are at the heart of our survival.

But here's the truth: wetlands are disappearing faster than ever. And when they vanish, so does our water, our food, and our future.

That's why we're coming together for the **LIVE-EX Virtual Dialogue on Preservation of Wetlands** — a space led by young people like you, ready to speak up for climate justice and protect our planet's natural water banks.

Date: 26 August 2025

Time: 2:00 PM EAT / 1:00 PM CEST

Location: Zoom

What to expect?

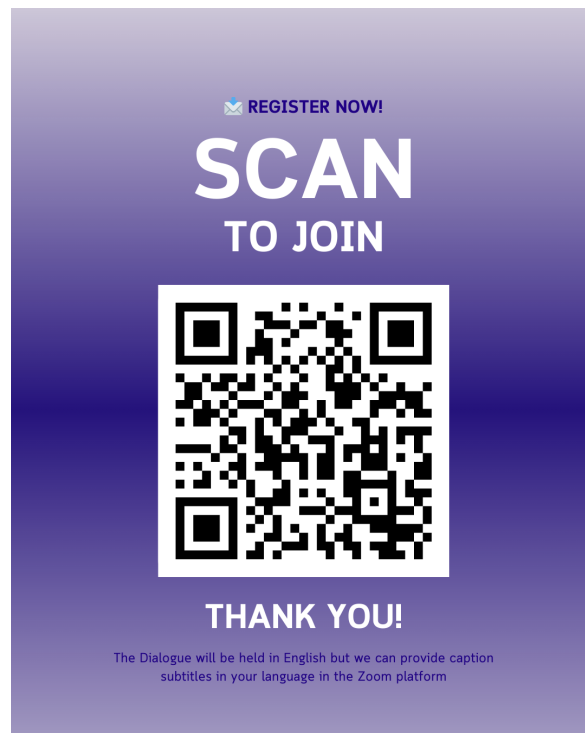

Youth voices from across Africa and beyond 

Stories of how wetlands sustain our communities 
Actions we can take together to defend life and biodiversity 

This isn't just another webinar. It's about **our future**. Your voice matters — and together we can make sure wetlands remain alive for generations to come.

 **Register now** (or scan the QR code below).

 Wetlands = Life.
Let's protect them together.
